Description

28 is an exploration of specificity in manufacturing. Instead of designing form itself, here the intent was to design a system of making that yields form.

Individual 28 pendants result from a complex glass blowing technique where by air pressure is intermittently introduced into and then removed from a glass matrix which is intermittently heated and then rapidly cooled. The result is a distorted spherical shape with a composed collection of imploded inner shapes, one of which acts as a shade for the light source.

Standard 28s are made with clear glass exterior spheres and milk white interior lamp holder cavities. 28s are possible with infinite versatility in color compositions, sizes and shapes.

Each pendant comes standard with a coaxial cable, adjustable up to 472"3/8. Longest and shortest lengths are determined by client, Bocci fabricates all lengths between these measurements. Specified shortest and longest lengths are from the underside of the canopy to the underside of the pendant.

There may be variance of $\pm 1/8$ " on specified shortest and longest lengths
Remote mounted power supplies recommended for ease of long term maintenance.
Installation to be done by certified personnel to ensure code compliance.
Lamps and power supplies are included.

Length Measuring Guide

Best practices for wiring multiple single pendant fixtures with remote mounted power supplies:

- Multiple single pendant fixtures should be wired in parallel. DO NOT wire in series.
- Bocci recommends a home run line for each fixture location to avoid significant voltage drop.
- Calculations for distance to the power supply, or required wire gauge in order to avoid voltage drop, are the responsibility of the installing party.
