

Palma

Description

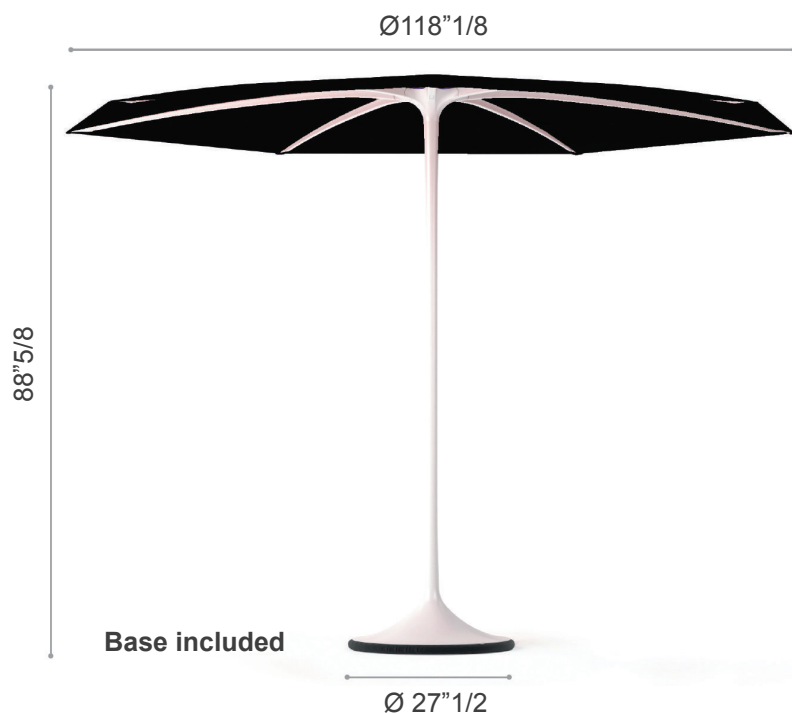

Palma is the first automatic umbrella! Palma is like a chameleon that fits perfectly on every type of terrace. Top engineering combined with a very refined design results in this revolution called Palma, a strutless garden umbrella with the following characteristics: Organically shaped tapered ribs; Strutless design; Organically shaped screwless hub; Integrated gasspring for automatic opening; Tapered aluminum pole; Matching base with quick-release mechanism; Tire for easy movement on the terrace. Red Dot Award Winner "Best of the Best". An innovative and revolutionary system and truly the first of it's kind!

Palma

Dimensions

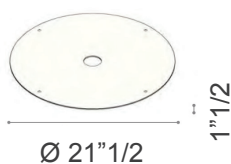

Ø 118" 1/8 x 88" 5/8H

Base: Ø 27" 1/2

Optional Ballast base

Round plate in galvanized steel with 4 screw holes and a central hole.

Finishes and materials

Pole: Coated aluminum in White, Sand or Black colors.

Cover: Fabric (White, Cappuccino, Black, Rock, Rose or Sage Linen).

Aluminum is a non-ferrous metal, which combines great mechanical rigidity with light weight; this makes it especially suitable for making furniture. If treated correctly it has a good resistance to corrosion. One of the treatments is powder coating. After a chemical pre-treatment an epoxy powder is applied statically and baked.

These **fabrics** have been woven from masscolored acrylic fiber; optimal water and UV resistance, plus years of comfort.
