

28 Stem

Description

Floor lamp with structure in a black or brass finish with a 13³/₄ diameter base. Made with glass lamp holder cavities. Pendants comes in clear or colored glass.

The lamp is created as a result from a complex glass blowing technique whereby air pressure is intermittently introduced into and then removed from a glass matrix which is intermittently heated and then rapidly cooled. The result is a distorted spherical shape with a composed collection of imploded inner shapes, one of which acts as a shade for the light source. LED lamps and power cord are included. Dimmable with build-in dial control.

Please note: The brass used in our Stem Series is untreated and, as such, will develop a natural patina over time. To avoid any marking or tarnish on the brass during handling and installation, please use the gloves provided in your shipment.
