

Alura

Design: Kris Van Puyvelde

Description

The elegant Alura Lounger. Particularly clever and distinctive sunlounger, with its patented positioning mechanism, operated by a piston hidden in one of the rear legs. When bringing up the backrest, the seat and footrest are lowered, while the knees are lifted. Thus the Alura 195 sunlounger offers unequalled comfort. The only disadvantage is that you might not want to get up once you are enjoying the perfect 'spa position'. It goes without saying, that the Alura Lounge collection is a perfect match to the Alura chairs and loungers, and vice versa.
