

Carés

Design: Kris Van Puyvelde

Description

The beautiful Carés Armchair has a frame made from the finest teak, known for its durability and rich, warm tones. The back of the chair is wrapped in a cord with twisted Batyline fibers, which therefore does not absorb water at all. For the seat, it was chosen to expertly weave this same cord according to a classic cross-shaped pattern. The result gives the Carés a charismatic look, literally and figuratively intertwining past and present. Whether in a cozy garden corner or on a lively terrace, this chair will offer the comfort and allure Royal Botania is known for.
