

NOHRD DumbBells Rack

Description

The NOHRD DumbBells storage rack, in a solid wood, angled frame, is a true organizer for your weights, as well as a space-saving solution. It has been constructed for extreme stability to safely hold 18 dumbbells and is suitable for use in the home or commercial gym.

DumbBells and rack both constitute a sleek, tailored design: the DumbBells diameter are kept uniform per row, while the angled, solid wood rack's frame is designed for maximum space-saving and stability.

Nine pairs of dumbbells, with 5.5 lbs (2.5 Kg) increments between weights, ranging from 11 to 52.9 lbs (5 to 25 Kg).
