

NOHRD WeightPlates Tower

Description

A combination of premium wood and metal, the NOHRD WeightPlate Tower is a solid wood and steel weight rack with individual WeightPlates, a Long Barbell, and two shorter Dumbbell Barbells.

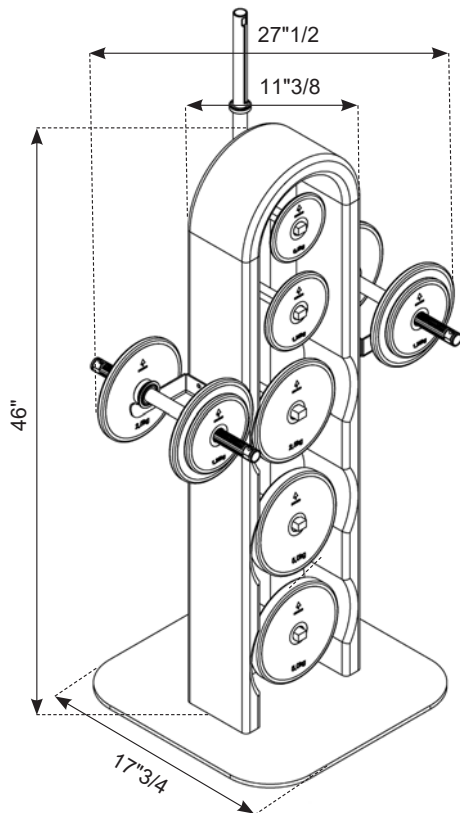

Beautifully designed and built to last, the WeightPlater Tower is a compact and versatile piece of strength training equipment.

An update on conventional weight plates and bars, WeightPlate Tower bars have an integrated SlideLock™ System that holds the WeightPlates in place and removes the need for cumbersome clips or collars.

WeightPlates Tower
