

Heywood Tub

Design: Faro Lab

Description

Heywood Tub is a ceiling fan equipped with FSC-certified pine wood blades sourced from responsibly managed forests. It includes a summer/winter reverse function, and a remote control with programmable timer. It features an energy-efficient DC motor with precise speed control, quiet operation, and smooth acceleration and deceleration. The motor consumes up to 70% less energy than conventional fan motors, while its lightweight construction facilitates installation.

Specifications

Motor Type: DC Motor.

Electrical Specifications: 110V-120V - 50/60Hz - Dry locations only. **Control System:** 0-10V Compatible.

Fan Power (W): 4-5-7-13-22-32.

RPM: 58-75-94-124-152-173.

Airflow (CFM): 1983-2557-3447-4269-5397-6234.

Sound Intensity (dBA): 29-30-31-33-39-43.

Reverse Function

Reversible summer/winter function optimizes airflow for seasonal comfort and improves heating efficiency by redistributing warm air.

Dimensions

Ø52" x 7"1/2H - Cod. 33838-US / 33839-US
