

Rudder

Design: Faro Lab

Description

Ultra-compact ceiling fan designed for rooms ranging from 189 to 301 sq. ft. Equipped with an energy-efficient DC motor, it offers 6 adjustable speeds, a summer/winter reverse function, and an included remote control. The DC motor ensures quiet operation, precise speed control, and reduced energy consumption compared to conventional fan motors. Suitable for sloped ceilings, it provides versatile installation options and efficient air circulation.

Specifications

Motor Type: DC Motor.
Electrical Specifications: 110V-120V - 50/60Hz - Dry locations.
Control System: 0-10V Compatible.
Fan Power (W): 4-6-10-17-24-35.
RPM: 85-109-134-159-180-203.
Airflow (CFM): 2566-3316-4109-4935-5521-6146.
Sound Intensity (dBA): 37-37-38-40-43-4.
Number of Blades: 3.
Maximum Tilt: 12°.
Control Type: Remote control with timer.

Dimensions

Ø52" x 9"1/8H - Cod.34298-US, 34297-US

Reverse Function

Reversible summer/winter function optimizes airflow for seasonal comfort and improves heating efficiency by redistributing warm air.

Finishes & Materials

Structure: Aluminum.
Blades: Plywood.
